📍 Bangalore, India

PROFILE

Dedicated data analyst with 1 year of experience in monitoring & evaluation (M&E) and data analysis, along with 6 months of experience as a guest lecturer. Proficient in Python, R, SQL, Excel, and Power BI. Skilled in data analysis, KPI tracking, and generating actionable insights to support decision-making. Strong communicator with a focus on accuracy and timely reporting.

WORK EXPERIENCE

Data Analyst, Monitoring and Evaluation (M&E)

05/2025 – Present | Bangalore, India

Diya Ghar

- Built automated data pipelines using Python, PostgreSQL, Google Sheets APIs, and Power BI to centralize attendance, enrollment, dropout, and beneficiary data across multiple centers.
- Designed ETL workflows for extracting, transforming, and loading data from Google Forms, Excel files, and survey tools into centralized reporting systems, significantly reducing manual reporting efforts.
- Developed and maintained interactive Power BI dashboards to visualize key project indicators, track beneficiary reach, and support real-time decision-making.
- Implemented attendance analytics systems for center-wise weekly/monthly average attendance tracking and child-wise attendance percentage monitoring.
- Collected, cleaned, and analyzed program data to support DiyaGhar's education and child development initiatives.
- Analyzed student performance using different statistical tests and data analysis techniques in Python.
- Participated in baseline and endline evaluations, analyzing data from over 1,000 beneficiaries across urban minority communities.
- Worked closely with the M&E team to ensure indicator tracking aligned with project logframes and reporting requirements.
- Created concise, data-driven reports, dashboards, and visual summaries for donors, program managers, and external stakeholders.

Guest Lecturer (Department of Computer Applications)

08/2024 – 01/2025 | Bangalore, India

Koshy's Group of Institutions

- Delivered lectures on Cloud Computing, Java, DBMS, and R Programming, covering both foundational and practical concepts.
- Mentored students in hands-on projects related to Java development, database systems, cloud applications, and data analysis using R.
- Conducted workshops on Java development, database optimization, cloud deployment, and data visualization techniques.
- Developed course materials, tutorials, assessments, and project-based learning content aligned with industry requirements.
- Collaborated with students and faculty through technical discussions, mentoring, and problem-solving sessions, strengthening communication and teamwork skills.

EDUCATION

Christ Deemed to be University

08/2022 – 05/2024 | Bangalore, India

Masters of Science (Data Science)

Kristu Jayanti College

06/2019 – 05/2022 | Bangalore, India

Bachelors of Computer Applications

TECHNICAL SKILLS

- **Data Cleaning and Processing:** Handling missing data, duplicates, and formatting issues | Ability to transform raw data into structured formats
- **Data Analysis and Management:** SQL | Power BI | Advance Excel
- **Libraries:** Pandas | Matplotlib | Numpy
- **Programming:** Python | R Programming
- **Operating Systems:** Windows | Linux | MacOS
- **Report Writing & Visualization:** Creating concise reports and dashboards for stakeholders | Translating data insights into actionable recommendations

SOFT SKILLS

- **Attention to Detail:** For cleaning and interpreting data accurately
- **Communication:** Explaining data insights to non-technical audience.
- **Time Management:** Handling multiple datasets or reporting tasks under tight deadlines
- **Team Collaboration:** Working with M&E team, program managers, and field staff.

PROJECTS

Diyaghar_Data_System

Data Pipeline

- Built an end-to-end automated data pipeline using Python, PostgreSQL, Google Sheets APIs, and Power BI to centralize attendance, enrollment, dropout, and beneficiary data across multiple NGO centers.
- Designed ETL workflows for extracting, transforming, and loading data from Google Forms and Excel sheets into a centralized PostgreSQL database.
- Developed interactive Power BI dashboards for center-wise monthly/weekly attendance analysis, child-wise attendance percentage tracking, enrollment monitoring, and real-time reporting.
- Technologies Used: Python, PostgreSQL, Power BI, Google Sheets API, Pandas, Google cloud.

Student - Performance Analysis [↗](#)

This project analyse the performance of Diya Ghar's alumni vs Non-Diya Ghar alumni studying in government school and Private school using T-test

- Performed statistical analysis on student performance dataset (DG alumni vs Non-DG alumni).
- Applied T-test to determine if score differences were statistically significant.
- Created visualizations and documented findings using Google Colab and Markdown.
- Version-controlled all code and documentation in GitHub for reproducibility.

Asia Cup - 2025 prediction [↗](#)

Cricket Analysis

- A Python-based simulation to track the probability of each Super-4 team (India, Pakistan, Sri Lanka, Bangladesh) winning the Asia Cup 2025.
- Monte Carlo simulations are used to estimate title-winning probabilities and generate charts showing probability trends over time.

Indian Sign Language to Text Conversion: A Real-Time Web App [↗](#)

- Developed a system to accurately interpret Indian Sign Language (ISL) gestures from video inputs and convert them into real-time text captions.
- Role: Lead Frontend Developer, collaborating with a team of three
- Technologies Used: Streamlit, Python, MediaPipe, LSTM-based model, TensorFlow, OpenCV
- Skills Strengthened: Responsive web design, real-time data processing

INTERNSHIP EXPERIENCE

Unizen Technologies pvt ltd

12/2023 – 04/2024 | Bangalore, India

Internship (Full Stack Developer)

- Collaborated with senior developers to design and develop scalable and responsive web applications, ensuring adherence to project specifications and timelines.
- Technologies Used: HTML/CSS, JavaScript, Node.js frameworks
- Enhanced user experience and interface functionality through effective implementation of frontend technologies.
- Actively engaged in team meetings and brainstorming sessions, offering insights and suggestions to improve project efficiency and effectiveness.
- Participated in knowledge-sharing sessions, contributing to the team's collective learning and growth in emerging technologies and development practices.
